Carenado  
Publisher:  
Aerosoft GmbH  
Release Date: 28 Jan, 2015

### Minimum:

**OS:** Windows XP/Vista/7/8

**Processor:** 3 GHz, multi-core CPU (or, even better, multiple processors)

### Memo

English

i really like this plane i am not qualified to compare because i started this game with this plane and have not flown much others for me it is easy to fly, it can be a hand full but why fly a sim when all you do is full auto pilot ? sometimes you really feel like you have to work to maintain altitude and heading, great feel :D. i hope one day they (caranado) will make the O-2 version with

---

the added windows and more rugged mil. feel/exterior/interior to it.. To be honest, I enjoy this plane. This aircraft is nothing like a normal cessna, but I wouldn't expect it to. This Aircraft is high quality and is fun to fly. The HD graphics are nice, the addition of multiple camera views are nice and very convenient/useful, the animations are awesome, and the aircraft flies beautifully. However, this is not a beginners aircraft, it's much different than any normal cessna 152/72/82. It takes off different, it flies different, it lands different, and it takes a while to get used to. When you Purchase this aircraft, be warned, there are some bugs. Two of the bugs that stand out to me are that the transponder is glitched where you can see a bunch of numbers by the knobs like they're glithing through the transponer, and that the avionics are already on when the aircraft is started. For example, I spawn in in the aircraft and the avionics switch is already on when the battery is off and the GPS display thing is on. These are the only bugs I noticed, I'm sure there may be a few more but these are the bugs that stand out to me. Other than those little things, I highly reccoment this aircrat who may like to do VFR/IFR flight. It a fun aircraft and other than the two bugs listed, it's damn near perfect.. i really like this plane i am not qualified to compare because i started this game with this plane and have not flown much others for me it is easy to fly, it can be a hand full but why fly a sim when all you do is full auto pilot ? sometimes you really feel like you have to work to maintain altitude and heading, great feel :D. i hope one day they (caranado) will make the O-2 version with the added windows and more rugged mil. feel/exterior/interior to it..
